CHURCH FURNITURE AND CLERICAL ROBES.

" Let all things be done decently and in order."

Thas been justly stated, that while changes are continually occurring in the conduct of the various Establishments in whose modes of doing business the interests of the greater portion of the community are involved, yet comparatively little alteration has taken place in the charges of those Articles which are required for the use of the Church, competition having been scarcely awakened, in consequence of the small demand in any particular locality.

Thus, while in other branches of business, Manufacturers and Retailers have alike depended upon small profits and increased returns, it is notorious that the *prices* of Clerical Robes and Church Furniture have continued almost without alteration.

In the hope of bringing this branch of trade to the level of others, and extending it far beyond the Midland Counties, Messrs. Jones and Willis, at the fuggestion of distinguished individuals, have opened a Depôt for Church Furniture and Clerical Garments in Birmingham, where Clergymen and Churchwardens may be supplied with suitable articles having appropriate designs.

The Homily for the repairing, keeping clean, and comely adorning of Churches, very properly admonishes us, by the care we take with our own houses, of the care we ought to take of the House of God. to see that it is properly furnished and appropriately decorated.

"It is a common custom used of all men, when they intend to have their friends or neighbours to come to their bouses to eat or drink with them, or to have any solemn assembly to treat or talk of any matter, they will have their bouses, which they keep in continued reparations, to be clean and fine, lest they should be counted sluttish or little to regard their friends and neighbours; how much more, then, ought the HOUSE OF GOD, which we commonly call the CHURCH, to be sufficiently repaired in all places, and to be honourably adorned and garnished, and to be kept clean and sweet, to the comfort of the people that shall resort thereto."

This should certainly teach us that for the Furniture of the Church, the "Holy Table," the "Fair Linen Cloths," and other articles "consecrated" or "separated" to the worship of God, it is indecorous to make use of any ordinary material, bearing no emblem of having been dedicated to the service of the Lord.

In entering more extensively into this department of their business, it will be their great object to supply suitable Church Furniture and Attire, at as small a cost as, and even in some instances, at a lower price than is given for ill-adapted articles. Simplicity, combined with strict propriety, will be constantly kept in view in their ornamental designs.

To fecure excellency and durability, the greatest attention will be given to the manufacture of the Articles, and thus they hope to obtain the approbation of those who may favour them with their orders.

PREFACE.

In iffuing this, the 48th Edition

of their Illustrated Catalogue of Ecclesiastical Furniture, Decorations, Robes, &c. beg gratefully to acknowledge the very extensive patronage and the

many kind expressions of appreciation they have received since their commencement; and they affure their Patrons, that with the affiftance of the best Artists, their productions will be found in keeping with the increased knowledge of Ecclesiastical Art.

In consequence of the great demand in the various departments of their Trade, and with a view to facilitate the better execution of their London Orders, Jones and Willis have taken New and Extensive Premises, No. 43, GREAT RUSSELL STREET, (opposite the British Museum) and thirty doors from their late place of business.

JONES AND WILLIS, recognifing the principle on which they opened, in 1846, their Church Furniture Establishment, of "fmall profits and increased returns," adopt the lowest scale of charges possible.

Altur Cobers

Are strongly recommended to be made up as in Fig. B; this is the ancient, correct, and by far the most beautiful way. The slowing lines of drapery in Fig C. are practically inconvenient, and not in harmony with the straight lines of the architecture of our Churches; whilst a Frontal made up as A. has a very great air of poverty.

Loose Cover. Fig. C.

Fig. A.

Fig. B.

To facilitate the ordering of their Made-up Covers, Jones and Willis submit the prices of the Plain Cover in three different fizes and shapes, without Embroidery, Fringes, &c. As they are given separately at pages 19 to 34, a calculation can be made by adding to the Plain Cover the different articles required.

Brond Cloth Cobers,

Two yards wide, without Seam.—In Crimson, White, Green, or Bishop's Purple.

For a Table 4ft. 6in. long, 2ft. 10in. wide, and 3ft. high, and for every additional 9 inches in the length of the Table, $\frac{1}{4}$ yard extra Cloth and $\frac{1}{2}$ yard of Shalloon will be required. If the Altar is 7ft. or more long, 2ft. 9in. wide, and 3ft. 2in. in height, which is the fize recommended, the price will be extra in proportion.

Extra Rich Ribbed Silk.

JONES AND WILLIS have introduced the following extra flout quality of Ribbed Silk, 28 and 48 inches wide, 23s. and 48s. per yard, for Embroidering upon, where the Frontals are more or less covered.

In Green, Crimson, Bishop's Purple, and White.

FOR CHASUBLES AND OTHER VESTMENTS.

Rich Silk Welbet.

No. 7.—24 inches wide, 27s.6d. per yard.

To obviate the ill appearance of the seam, which is caused by the usual width of Velvet, Messirs. Jones and Willis have set up Looms for the manufacture of Velvet 24 and 48 inches wide, of the richest quality. As the increased width diminishes the number of breadths, it very decidedly improves the appearance.

For a Table 4ft. 6in. long, 2ft. 10in. wide, 3ft. 2in. high, and for every additional 9 inches in the length, ½ yard of Velvet and Shalloon.

Cottas.

Lawn, 25s. 30s. 35s. 40s. 45s. 50s.

It has been found that the Lawn now in use is not durable, therefore Jones and Willis have manufactured an article of superior texture, equally light in appearance.

In ordering, it will be requisite only to state the height of the wearer, price, fabric, and if to be worn over the Cassock or Coat.

Gircular Surplices.

The Shape is a complete circle; there is no feam or opening in front. The Sleeves are a semicircle the full length of the skirt, and the Collar is without slit or button, which gives an entirety to the whole Surplice.

In confequence of its taking confiderably more materials than the ordinary Surplice, it is recommended in Linen Lawn, as being a light fabric. The price will be 35s. 40s. 45s. 50s.

PATTERNS of materials fent by Post if required.

Robes.

The greatest care will be taken that none but the best articles will be used, charged at the lowest remunerating price, and ACCURATELY made.

In the Order the University should be stated.

Enquiries having been repeatedly made why their Cambridge Hoods are charged more than the Oxford, Jones and Willis beg to state, that what are sent from their Establishment are made from old examples, and the recognised shapes of each separate University, and consequently, as the Cambridge Hood takes more material to be the full correct shape, the price must necessarily be higher, their object being to charge every article its relative value.

Lustre Coat and Light Summer Material, from 30s. to 40s.

- No. 1 Shape, much worn by the Clergy, is made to fit close in front to the body and cravat, and may be worn buttoned or otherwise. Clergymen, by referring to the Diagram No. 1, will see the great difference in respect to the Coats made by tailors whose business is with the Laity.
- No. 2 turns one hole and buttons to the top if required.
- No. 3 has a broader turn-down Collar in front.
- No. 4 fits close in front as No. 1, and has a Cassock-shaped stand Collar. This Collar is fometimes made with a fall and retains the same shape.

If made to button on both fides, 2s.6d. extra.

- No. 2 Vest buttons to the cravat, and the space between the collar will admit the bands.
- No. 3 Vest is a clerical dress, and can be made also to button to the neck if required.
- No. 4 is Cassock-shaped. This difficult but beautiful Vestment is produced by a peculiar system, the result of many years application and experience. It is cut without the seam in front, and fits close to the chest and cravat, avoiding the unseemly sulness and falling below the cravat in front,—a necessary consequence of those made by any other method. An accurate circumference of the neck, taken close over the stock or cravat, will ensure a fit seldom obtained in this shaped garment.

WOOD AND METAL WORK.

Wood and Metal Work.

IN the following portion of their Catalogue, beg to call attention to the many new Defigns they have introduced.

These Designs have been especially prepared with a due regard to economy, simplicity, and truthfulness.

Elaborate and rich ornamentation has been generally avoided, as Meffrs. J & W. deem, they would be stepping out of their province, and attempting to interfere with the duties of the Professional Architect, by introducing into their Catalogue a collection of indiscriminate ornament, which, when used in the Church, might ill accord with the other purposely designed portion of the building.

But the following Defigns may fafely and with propriety be felected for the generality of our Churches, as they are fimple in character, and yet of fufficient folidity to produce a good effect, and in most cases, if preserved, they are capable of further ornament and enrichment.

Where it is defirable to have the Fittings very rich and ornamental, they should be specially designed for the purpose, and as Messrs. Jones and Willis have always a staff of experienced Gothic Workmen, they can considently undertake to prepare the most elaborate style of work in the best manner.

INTERNATIONAL EXHIBITION, 1862.

Abridged Opinions of the Press.

Jones and Willis have felected a few from the many criticisms that have appeared in the many influential publications in reference to the articles manufactured by them.

From the Quarterly Review, July, 1862.

"In the International Exhibition, 1862, Mediæval Art is not only displayed in a surprising variety of forms, but also in a Court arranged by the Ecclesiological Society, out of which we should name some meritorious Embroidery and Woollen Work of rich colours well contrasted, by Messrs. Jones and Willis, of Birmingham and London, under Mr. Street's inspiration."

From a Chapter by Dr. Owen, F.L.S., F.E.B.S. &c. on the Development of Ornamental Art in the International Exhibition, 1862.

"In the Mediæval Court of the Ecclefiological Society, Messrs. Jones and Willis, of Birmingham and London, exhibit, on the South Wall, examples of Embroidery in two Alrar Frontals, of great merit."

From the Ecclesiologist, June, 1862.

"We are able to speak in terms of warm commendation of the improvement both in the execution and design of most of the textile or embroidered fabrics of Ecclesiastical character here exhibited. Best of all are the Hangings, Altar Vestments, Church Linen, Pall, Carpets, &c. sent by Messrs. Jones and Willis, of Birmingham and London. We believe the design of these excellent works is due to Mr. Street."
